COURSE DESCRIPTION
This CME program is open to orthopaedic surgeons, residents, nurses, and members of the orthopaedic and allied health industries.

- This meeting will focus on both primary and revision outcomes, surgical approaches, new materials and design as well as address problems of articulation choice, fixation, bone deficiency, instability, trauma, and infection for hip and knee replacement.

- Topics delve into a triad of design, patient factors, and technical proficiency responsible for achieving clinical longevity in hip and knee reconstruction.

- An assemblage of contemporary thought leaders will probe the boundaries of these problems and offer solutions for joint pathologies where arthroplasty is indicated.

- Plenary commentary, didactic clinical reports, technique videos, debate, and case challenges define the formats of presentation, which provide an optimal learning opportunity for orthopaedic surgeons and other allied professionals involved in joint reconstruction.

LEARNING OBJECTIVES
As a result of attending this symposium, the participant will be able to:

- Identify problems, concerns and solutions relevant to primary and revision hip and knee arthroplasty including articulating surface wear, inter-component failure, fractures, infection and bone loss as well as short- and long-term tissue response.

- Discuss optimal clinical application of current and evolving fixation techniques in primary and revision procedures including cement, hydroxyapatite, porous coating, press fit, impaction grafting and evolving porous metal technologies.

- Appraise evolving surgical techniques and implant technologies through didactic presentation as well as evaluate early and long-term clinical outcomes.

WALKING WITH GIANTS® ASK THE EXPERTS
An intimate session to discuss your complex cases.
CCJR participants have an opportunity to present a problem hip or knee case to faculty experts for discussion on Thursday, December 10, 2015.

EXHIBITOR SATELLITE & BIOSKILLS EVENTS
CCJR participants can also attend company-sponsored workshops for increased exposure to emerging and contemporary technologies as well as gain surgical technique experience.

COURSE LOCATION
The Hyatt Regency Grand Cypress, a resort property in Orlando, Florida, is centrally located to the Magic Kingdom, Universal Studios, EPCOT Center, Busch Gardens, Sea World, and other major attractions. The resort’s 1,500-acre setting includes a spectacular pool with grottos, tumbling waterfalls and water slides, a stunning 21-acre lake abundant with water sports and recreation. Experience superb dining in any of Hyatt’s restaurants while offering a 45-hole Jack Nicklaus-designed golf course. The resort offers tournament quality tennis, a health and fitness center, rental bikes and a five mile jogging trail.

Marriott’s Orlando World Center, a short distance from the Hyatt and a comparable luxury resort, is providing additional rooms for the program. Transportation will be provided during meeting hours to the Hyatt.
